Examiner	Art Unit		
LOIS ZHENG	1793		

	LOIS ZHENG	1793					
The MAILING DATE of this communication appe	ears on the cover sheet with the c	correspondence add	ress				
THE REPLY FILED <u>13 May 2009</u> FAILS TO PLACE THIS APP	LICATION IN CONDITION FOR AL	LOWANCE.					
 The reply was filed after a final rejection, but prior to or on application, applicant must timely file one of the following application in condition for allowance; (2) a Notice of Appe for Continued Examination (RCE) in compliance with 37 Continued 	replies: (1) an amendment, affidavit eal (with appeal fee) in compliance	t, or other evidence, w with 37 CFR 41.31; or	which places the r (3) a Request				
periods: a) The period for reply expires <u>3 months from the mailing date</u>	of the final rejection						
b) The period for reply expires <u>5</u> months from the mailing date of the limit rejection. The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.							
Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).							
Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

/Roy King/							
Supervisory Patent Examiner, Art Unit 1793							

Continuation of 11. does NOT place the application in condition for allowance because: Applicant argues that Hansen teaches specific ranges for its coating solution ingredients and they are not to be altered. The examiner does not find applicant's argument convincing because Hansen uses open-ended phrases such as "containing" and "comprising" that allow presence of additional ingredients. In addition, the concentrations of the coating ingredients as taught by Hansen overlap the claimed coaiting ingredient concentrations. Therefore, a prima facie case of obviousness exists. Applicant further argues that Hansen teaches away from neutralizing acid because Hansen teaches that the addition of more free P2O5 is permitted. The examiner does not find applicant's argument persuasive because Oei teaches using manganese carbonate to control free acid concentration. Therefore, one of ordinarys kill in the art would have been motivated to add manganese carbonate as suggested by Oei to the coating composition of Hansen in view of Clifford in order to achieve free acid control. Applicant reiterates that adding nitroguanidine as claimed improves process time. The examiner maintains her position that nitroguanidine is a known accelerator, as shown by Clifford. It's ability to improve process time is not unexpected. Applicant also reiterates that Bittner teaches zinc or zinc manganese phosphate coating on galvanized or alloy galvaized surfaces, no on iron or steel surfaces as claimed. The exmainer maintains her position that the combination of Hansen, Clifford and Bittner is proper because Hansen and Bittner both are concerned with sludge reduction in manganese containing phosphate coating solutions.

Continuation of 13. Other: Since new amendment to claim 17 does not change the scope of finally rejected claim 17, the new amendment is entered. The rejections of claims 17-25 are also maintained.
